

Courses in Industrial Sciences and Information Technology

The Cnam's educational programs have **historically** been rooted in technology and science.

Today, **1,000 engineers** graduate from the **EICNAM** per year in a variety of specialisations that range from chemistry to mechanics to IT.

Recently, aeronautics, railway and nuclear programmes have been added.

Departments

Chemistry, nutrition, health, environment, risk
Electronics, automation, systems
IT
Energy construction engineering
Mathematical engineering
Electrotechnical and mechanical systems engineering
Quality measure analysis, materials engineering

FFL Trainings

French as a Foreign language (25 weeks)

French as a Foreign Language (15 weeks)

French as a Foreign Language (1 week)
