

Plotting the SARS-Cov-2 (COVID19) Pandemic

Published on April 3, 2020 – Updated on December 21, 2020

How many people have been infected or have died as a result of the COVID19 pandemic? How many people have recovered from the disease. Josselin Noirel, researcher belonging to GBCM-Cnam laboratory, has built an application which relies on the CSSE (Johns Hopkins University) daily figures.

Covid

How to use it: choose a language (English or French), mention the name of a country (always in English) beginning with a capital letter. If you want to compare two countries or more, mention the two separated by a coma without any space.
