

Cnam Entreprises

Cnam Entreprises is a **professional education and training organisation** which is part of the Cnam. We offer a large range of programmes aimed at developing the skills of private- and public-sector employees. Our solutions include degree-granting courses as well as short modules, executive education seminars and customised training programmes. They can be **face-to-face, blended or fully digital**, depending on the objectives and preferences of our clients. We are able to meet the needs of companies' line and staff units thanks to our teams of instructors, researchers and experts.

A 30-person team is dedicated to supporting approximately 2,000 students and 300 companies who choose to work with us every year. In addition, we can deploy our courses on the national and international levels. **In a word: higher executive education is our core business.**
