

Franco-Chinese Institute DGUT / Cnam's programs

The Franco-Chinese Institute DGUT / Cnam China

The Franco-Chinese Institute DGUT / Cnam China created in June 2017 in partnership with Dongguan University of Technology (DGUT), is a higher education institution in engineering and technology, accredited by the Chinese Ministry of National Education. This institute is one of the 17 Franco-Chinese institutions labeled "IFC" as the major actors in Franco-Chinese academic and scientific cooperation.

The Franco-Chinese Institute DGUT / Cnam China provides high-quality engineer training "à la française" (in French way) by following the principles and methods of the Cnam, directly in China. It aims more broadly to stimulate student and professor-researcher exchanges between China and France and to contribute to connecting the academic and scientific communities.

High-quality engineer training provided

The institute enrolls **Chinese students** of its partner Chinese university - **the DGUT**, who have successfully passed the national entrance exam (**Gaokao**). **Students of non-Chinese nationalities** can also join its programs by application procedure. It offers students in initial training mode (full time courses) a four-year Bachelor's degree in "Engineering Sciences", with the possibility to follow the 3rd year at Cnam in France.

These programs, taught in English, French and Chinese, focus on 3 following fields:

Mechanics
Computer science
Telecommunications

Students after successfully finished the program will receive recognized **double degrees: the BENKE (BAC+4) awarded by DGUT and a Bachelor's degree awarded by Cnam.**

Graduate students can either apply for job in the field of their study as it is highly demanded by companies, or pursue a Master's degree in Chinese, French or other universities.

Starting from 2021-2022 academic year they will also be able to apply, under student status at the Cnam, to one of the three international Master programs taught in English and open to international students, M1 and M2 in :

Mechanics
Computer science
Telecommunications

+ Cnam's international outreach

Already present in the [heart of the territories throughout France](#) and overseas, Cnam also has a strong international outreach. Through five centers in China, Côte d'Ivoire, Lebanon, Madagascar, Morocco and partnerships in 30 other countries around the world, including 15 countries of [the Cnam's INTEC network](#) in Africa, Cnam makes all or part of its training offer accessible to students and adult learners abroad.

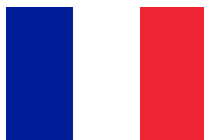

[This international network](#) aims to meet the specific needs and expectations of partners and countries in terms of education, vocational training and employment, in order to be as close as possible to socio-economic actors. Its intention is realized through actions and training programs with or without diploma,

in collaboration with academic, institutional and professional partners. These actions lead to the dissemination of the Cnam's know-how through the sharing and transfer of skills. In addition, the Cnam has also been increasingly present for several years in international projects with multilateral or bilateral funding for cooperation in the fields of training and expertise.
