Doctoral studies at the Cnam

The Cnam organizes training in and through doctoral research via a Doctoral School attached to the site (ED Abbé-Grégoire), a co-accreditation Doctoral School (SMI), both housed in the HESAM University doctoral college and partner doctoral schools. The Cnam offers some thirty doctoral specialties both in the human and social sciences and in management sciences as well as Engineering sciences. The Research division coordinates and combines the actions to be implemented within the framework of the doctoral schools. recherche.cnam.fr
